

Fred,

1. Attached is the agenda PMAP will follow on 10-11 June.

2. In addition to the production plan review + Bob Ames's special subject, I want to plan for at least one substantive project review in each of SOVA and NE SA. I recommend that you ask Ray and Bob respectively to identify one major current project which they would like the 4 members to assess and counsel on. Then the afternoon of the first day would be devoted to meetings with the analysts on these projects*. The topics should be well enough started so the analysts have something to say, but not too far to influence.

3. All the "social support" we'll need is a room for ^{ILLEGIB} ~~10~~ people b) sandwiches on day #1, c) lunch in the EDR on day #2.

* And collection of any reports supporting the project before hand.
